

Navy® Collection

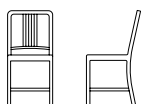

Emeco (Electrical Machine and Equipment Company) was founded in 1944 by Winton Dinges to make Navy® chairs for submarines in WWII. The 77 Step Process was developed by Alcoa and Emeco to manufacture the chairs—and it is still how we make them today.

Navy Chair
1006

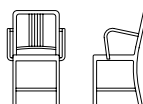

W: 15.5"/39cm

red (can be used outdoors), snow white (can be used outdoors), flint gray (can be used outdoors), charcoal, persimmon orange, grass green.

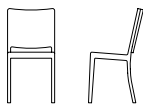

At least 111 rPET plastic bottles per chair

**Maximum height for swivel chair is 33.5"/85cm. Maximum seat height for swivel chair is 20"/51cm.

Hudson Collection

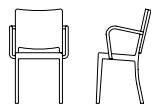

Designed for the Hudson Hotel in 1999, Hudson is a more neutral transmutation of the classic Navy® Chair. "It's an attempt to remain faithful to the Emeco spirit," says Starck. "The styling is meant to be very pure, very reductive. It's not meant to be loud." The Hudson chair was added to MoMA's permanent design collection in 2000.

Hudson Chair
HUD

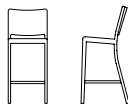

W: 15.5"/39cm

Kong® Collection

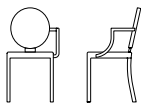

Kong was designed in 2003 for the Kong Chinese restaurant in Paris, and is now in restaurants from Iceland to China. The one arm detail was Starck's solution to the problem of elegantly slipping up to the bar. Kong takes 24 separate pieces of aluminum, hand formed and welded to make each chair. And it takes 8 man-hours to hand polish. It's more like making a sculpture than a chair.

Kong Chair
KONG

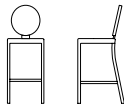

W: 15.5"/39cm

Café Table, Emeco Stool & Table

Designed in 2000, the ultra minimalist Café Table has an anodized cast aluminum base which is naturally matte grey – perfect for camouflaging shoe scuffs. The Emeco Stool was commissioned by MoMA in 2001 for a retrospective of work by Mies van der Rohe.

1951™ Chairs & Stools

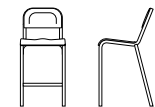

A friend sent us an Emeco chair from 1951. It was kind of dumpy so we asked BMW Designworks to update it in the same way they updated the MINI. Launched in 2005, it is now part of the Cooper Hewitt National Design Museum in New York City.

20-06™ Collection

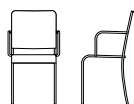

Sir Norman Foster wanted a more “anonymous” version of the Navy® chair for an indoor/ outdoor café in 2006. The chairs have solid bars of aluminum at the bend in each leg – resulting in a super strong structure that can hold 1000 pounds, and yet weighs only 7 pounds.

20-06 Stacking Chair

* Café Table is also available in 30" & 36" diameter. 30" D increases overall weight by approx. 3 lb/1.3kg. 36" D increases overall weight by approx. 10lb/4.5kg.

**Bar-Height Table is also available in 30" diameter. That increases the overall weight by approx. 4lb/2kg.

Nine-O™ Collection

Ettore Sottsass was the first architect to use Emeco chairs out of their industrial context for homes and shops. We asked him to design an update—soft seat, wider and stacking. Sottsass died at the age of 90 (Nine-O) in 2007 just after the seeing the final prototype of his chair.
